

27 August 1982

MEMORANDUM FOR: Director of Scientific and Weapons Research

FROM: Director of Central Intelligence

SUBJECT: Letter from [redacted]

STAT

1. [redacted] is a highly competent scientist and technical entrepreneur. She called a while ago to say that there are some uses for monoclonal antibodies which she believes to be in our national security interest to know about and understand. She suggested that we have somebody versed in this subject talk to [redacted] mentioning the attached letter, who would be glad to provide information of any value to us. 25X1

2. Will you please see that somebody competent to discuss this subject follows up on this carefully.

William F. Casey
